

# Corporate Policy

## Sustainability & Environment

**We envision a world in which packaging provides people with the highest benefit at the lowest impact on the environment and society.**

We consider environmental and social responsibility as well as good governance an integral part of our business activities, strategies, and goals. We continuously improve our sustainability efforts along three key pillars:

**Corporate  
Sustainability**

**Product  
Sustainability**

**Value Chain  
Collaboration**

Based on this approach we strive for environmental protection and reduction of existing and potential environmental impacts by:

- ✓ Developing sustainable products & processes
- ✓ Using resources consciously
- ✓ Reducing waste & emissions
- ✓ Applying energy-efficient, low-emission technology
- ✓ Complying with relevant legislation

We are fully committed to a minimum use of resources, reduction of waste and emissions.

Through mutually reliable relationships with all stakeholders, we ensure a meaningful contribution to a more sustainable future.
